Abstract of JP 2001128139 (A)

PROBLEM TO BE SOLVED: To provide stream data reception terminal which reproduces alternative data without giving a feeling of incongruity to the audience in the case that transmission of stream data is interrupted. **SOLUTION:** When the volume of data stored in a data buffer 102 becomes smaller than a preliminarily determined volume, file data stored in a file storage device 104 is reproduced by an output device 105 instead of stream data.
